THE STATE TEACHERS' ASSOCIATION-WHAT IS THOUGHT OF IT. - The Superintendent, W. Z. Mitchell, of the Memphis City Schools, is not pleased with the composition of the State Teachers' Association lately in session in this city. In his last

monthly report he says:

I also lay before you a report of what was done at Nashville by the State Teachers' Association. There was little accomplished that one would expect from a conention of practical teachers. Those who participated in the proceedings were not, as a general rule teachers, but were of othor professions. The officers elect you will doubtless recognize as men not intimately connected with the active duties of the teachers' profession, nor would we concieve them as men so much interested in comnon schools as in theology, law, medicine and politics. Exchange on New York is taken at discount and is sold at one-tenth premium. There is but little doing in uncurrent money generally, though there is much activity in Bank of Tennessee notes. The rate here has been 47c buying and 50c selling, with but little demand. But owing to a large Memphis demand the buying rate has been kept firm, and on yesterday afternoon, Brokers generally had advanced in their figures to 50c, at which rate we think may be quoted to-day. Planters' Bank has for cotton to day, and more disposition on the part of holders to sell, than any day this week so far. All the fluor qualities offered were freely taken at the outside figure of 27 cents, and out their figures to 50c, at which rate we think | most orders have been filled, we suppose Oc is as much as it will command to-day

The New York gold market seems have been depressed by some cause, pe haps the anticipated sales by the Secretary of the Treasury, as provided for by Mr. Boutwell, for prices have declined steadily for two or three days. Whether Mr. Boutwell's bill shall be passed or not, a good deal of gold will shortly be paid out on account of the government. Next week there will be disbursed \$10,000,000 in curency on account of the December 7-3 oupons. Then on the 1st of January, coin nterest to the amount of \$12,000,000 will be due; on the 15th of January, \$9,000, 22 Public Square, now occupied by Perris and M. Marberg, Inquire . 000 in currency, and on 4'te 15th of Feb-Foster, No. 33 Public Square. ary \$11,000,000 in currency. Thus, within the next 60 days, the payments on account of interest will amount to \$20,000, 000 in currency, and \$12,000,000 in coin. This will prevent any accumulation of cur-

reney in the treasury, and will, at the same ime, render necessary sales of surplus gold. The New York Financial Chronicle of the 1st inst. says: "November has been chiefly remarkable for an unsettled condition of the markets, the result of combination of circumstances. The deficiency of the English barvest, and a consequent advance in wheat and flour abroad, have induced an active speculation in breadstuffs in the West; the result of which has been an extensive holding back of produce until near the close of navigation, with a rise in prices to almost unprecedented figures. This has naturally produced more of less monetary derausement at the westnore of less monetary derangement at the west-more of less monetary derangement at the west-rin centers of trade.

"In the merchandise markets a duliness has revailed, not to be adequately faccounted for rom the natural falling off in business which isually occurs in November. In most branches of business stocks are found to be larger at this standard of the fall business them. of ousness stocks are found to be larger at this late period of the fall business than was anticipated; and as it is not deemed safe to carry over goods of the current high prices, there has been an effort to realize upon both domostic and foreign merchandize at a heavy sacrifice. The cotton mills are producing much less, and the woolen manufacturers have very generally resolved upon either closing their mills entirely for a few weeks, or reducing the time of working to about eight hours per day. The development of this policy has produced at the close of the month a semewhat improved tone in the goods markets, but in nearly every branch of the policing trade the disposition, notwithstanding, is to realize upon goods, and to close the year with the realize upon goods, and to close the year with the smallest possible stocks. During the Bank of Shekyville at month of November there was a slight decline in prices in New York, but as compared with 1860, prices are much higher. For the purpose of showing the extent to which commercial values have been deranged during the last six years, the United States Economist makes a comparison of quotations at New York, for twenty leading articles of produce -which include some of the principal articles of food and the raw materials which lay at the basis of the largest branches of manufacture-giving average price for 1860, and the prices of Nov. 23, 1866, and it is found that the prices of last month were, upon the whole, less flank 106 per cent in advance of those of 1860 As, however, part of the rise is due to the Union Bank 100 Center Control of the control of the center prices of last month were, upon the whole, remium on gold, it is necessary to reduce the quotations of November to gold; and, upon that basis, the advance will be found to be within a fraction of fifty per cent. Thus placing current values upon the same level of comparison with those of 1860, the present range is found to be fifty per cent. above normal level. Loss of productive population and wasteful consumption of products during the war, have had an im-
